

URETHANE TUFF-TUBE® SPOUTS AND ELBOWS

Sioux Rubber & Urethane manufactures an innovative wear-resistant, seamless, polyurethane spout liner in 4" - 20" diameters, with standard lengths of 10' & 20' for new or existing spout applications. Custom lengths available upon request. This exciting new patented product called Tuff-Tube® is a replaceable slip-in urethane liner that counters material wear to spouting, saving time and money, extending useful life of the equipment and reducing down time. A worn liner can be rotated 120° - 180° to present additional wear surface. A completely used liner can be removed and replaced using the same spout in minutes. For more information and to view an installation video visit the Tuff-Tube® website at www.tuff-tube.com.

Tuff-Tube® is effective and convenient for spouting applications including:

- Agriculture
- Aggregate
- Mining
- Fertilizer

Conveyed materials cannot force itself under lining eliminating:

- Peeling up
- Buckling
- Plugging
- General spout failure

Lined spout elbows:

- Urethane liner permanently bonded to elbow
- Available with and without tapered leading edge
- Matched up with Tuff-Tube® liner for total spout protection
